

Weekly Disaster Stats Update

The Weekly Disaster Stats Update is published every week on Tuesday. The product is meant to provide a snapshot of major disaster statistics throughout the **fiscal year** to-date, at the national, division, and regional levels. New pages may be added over time and new charts or tables will be improved as feedback is received. Email inform@redcross.org with any questions or feedback.

Total Disasters (DRs) by Fiscal Year

SOURCE: Client Assistance System (CAS 2.0) – These statistics reflect all Regional and Disaster Relief Operation (DRO) events that have been logged in the American Red Cross CAS 2.0. These statistics do not include “non-case” events (e.g. mass care responses). “Direct Client Assistance Cases” refers to cases that have received financial assistance from the Red Cross. Disaster Services Automated Reporting System (DSARS) – DR statistics reflect significant operations that may have exceeded \$10,000, and were therefore designated a DR (Disaster Response) number in DSARS — these stats do not reflect non-DR statistics (e.g. single family fires).
